|---------------|-------------------|
| Date          | 30 September 2026 |
| Team ID       | SWTID-2026-5226   |
| Project Name  | Study Buddy API   |
| Maximum Marks | 4 Marks           |

### Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. For the Study Buddy API, the team explores useful features for students, groups similar ideas, and prioritizes the ideas that can provide the most useful study support through a simple API-based system.

### Step-1: Team Gathering, Collaboration and Select the Problem Statement

**Problem Statement:** Students need a simple and organized way to access study-related support such as study planning, learning resources, reminders, and progress information through a single Study Buddy API.

| Area                    | Brainstormed Need / Idea                                                        |
|-------------------------|---------------------------------------------------------------------------------|
| Study Planning          | Create and manage personalized study plans and schedules.                       |
| Study Materials         | Organize and provide access to subjects, topics, notes, and learning resources. |
| Task & Reminder Support | Track assignments, study tasks, deadlines, and reminders.                       |
| Progress Tracking       | Record completed study tasks and show learning/study progress.                  |
| User Management         | Provide secure student registration, login, and profile management.             |

### Step-2: Brainstorm, Idea Listing and Grouping

| Idea Group         | Study Buddy API Features                                                  |
|--------------------|---------------------------------------------------------------------------|
| Student Account    | Register, login, profile, and account management.                         |
| Study Planning     | Create, update, view, and manage study plans and schedules.               |
| Learning Resources | Add, organize, search, and retrieve study materials.                      |
| Tasks & Reminders  | Create tasks, set deadlines, and manage study reminders.                  |
| Progress           | Mark tasks as completed and view study progress.                          |
| API Integration    | Provide structured API endpoints for students and connected applications. |

### Step-3: Idea Prioritization

| Priority | Idea                      | Reason                                                         |
|----------|---------------------------|----------------------------------------------------------------|
| 1        | Study Plan & Schedule API | Core feature for organizing study activities and schedules.    |
| 2        | Task & Reminder API       | Helps students manage assignments, deadlines, and study tasks. |
| 3        | Learning Resource API     | Makes study materials easier to organize and retrieve.         |
| 4        | Progress Tracking API     | Helps users monitor completed study activities.                |
| 5        | User Management API       | Supports student accounts and secure access.                   |

**Selected Concept:** Study Buddy API — a student-focused API that supports study planning, learning resources, tasks/reminders, user management, and progress tracking.
