Project Name	Study Buddy API
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. For Study Buddy API, the statements focus on organizing study activities and tracking progress.

Study Buddy API – Customer Problem Statements

PS-1

Problem Statement (PS)

I am (Customer): A student

I'm trying to: Manage subjects, study tasks, notes, and learning resources in one place.

But: My study information is scattered across different applications and is difficult to organize consistently.

Because: I do not have a simple, structured way to access and manage study-related information.

Which makes me feel: Overwhelmed and less confident about keeping up with my study goals.

PS-2

Problem Statement (PS)

I am (Customer): A student

I'm trying to: Track my study progress and plan what I should learn next.

But: Creating, updating, and retrieving study tasks and progress requires repeated effort across different tools.

Because: There is no single structured API-based way to manage these study activities.

Which makes me feel: Uncertain about my progress and causes extra effort when planning study sessions.
