

Ideation Phase

Empathize & Discover

Date	30 September 2026
Team ID	SWTID-2026-5226
Project Name	Study Buddy API
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

For Study Buddy API, the empathy map focuses on a student who uses an API-based study support system to organize learning resources, manage study activities, and get useful study assistance.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise helps the team consider the student's goals, needs, behaviours, and challenges from the user's perspective.

Study Buddy API – Target User: College student who needs a simple digital study companion for organizing subjects, study materials, tasks, and learning activities.

Study Buddy API – Empathy Map Canvas

THINKS & FEELS	SEES
• Wants to study in an organized way. • Feels stressed when tasks and materials are scattered. • Wants quick access to study information. • Wants to track progress and stay motivated.	• Sees multiple subjects, notes, assignments, and resources. • Uses mobile/laptop study applications. • Sees deadlines and pending study tasks. • Looks for simple and easy-to-understand study support.
HEARS	SAYS & DOES
• Hears suggestions from teachers and classmates. • Hears reminders about assignments and exams. • Gets study tips and recommendations from peers. • Hears feedback about useful learning resources.	• Adds and manages study resources. • Organizes subjects and study tasks. • Checks progress and pending work. • Uses the Study Buddy API to access study-related services.
PAINS	GAINS / NEEDS
• Difficulty organizing study materials. • Forgetting deadlines or tasks. • Spending time searching for resources. • Difficulty maintaining a consistent study routine.	• Easy access to study resources. • Better organization of subjects and tasks. • Simple progress tracking. • Timely reminders and useful study support. • A convenient, student-friendly API-based system.

Study Buddy API – User Insight:

The student needs a simple and organized study support system that reduces the effort of managing learning activities and provides convenient access to study-related services.
