

Project Design Phase

Problem – Solution Fit Template

Date: 30 September 2026

Team ID: SWTID-2026-5226

Project Name: Study Buddy API

Maximum Marks: 2 Marks

Problem – Solution Fit Template:

Study Buddy API is designed to address the difficulty students face in organizing their study activities, finding suitable learning support, tracking progress, and accessing study-related features through a single system. The API provides a structured backend that can connect study-planning and learning features so students can manage their academic activities more efficiently and consistently.

Purpose:

- ☐ Solve common study-management problems through a centralized and easy-to-use API.
- ☐ Help students organize study activities, resources, tasks, and progress in one connected system.
- ☐ Provide consistent API endpoints that can support a student-facing application and future integrations.
- ☐ Reduce repetitive effort by enabling structured management of study-related information.
- ☐ Understand student study needs and provide a solution that fits their day-to-day learning workflow.

Template:

Target Users	Student Problems / Needs
Students who need a structured way to manage their learning activities.	Difficulty organizing study tasks, plans, resources, and progress across different tools or methods.
Existing Situation	Study Buddy API Solution
Students may use separate notes, calendars, reminders, or learning tools, making study information fragmented.	A centralized API for managing study-related data such as users, study plans, tasks, resources, and progress.
Key Features	Expected Value
User management; study-plan management; task tracking; learning-resource organization; progress tracking; API-based access.	Better organization, easier access to study information, reduced manual effort, and a consistent foundation for a Study Buddy application.
